

DON'T LET YOUR PAPER FILES SPEND ALL YOUR

Are your paper processes costing you money?

The Impact of Inefficiency

- Do you still use manila folders, pendeflex, redwell files and file cabinets?
- Did you know your staff will spend 50% of their time searching for files?
- The average file is copied 19 times.
- The average cost to file a document is \$20, 7.5% go misplaced for a cost of \$120, and 3% go lost and to replace, \$220.
- 70% of businesses are out of business within a year after incurring a disaster (fire, flood, hurricane, theft or sabotage.)
- DO YOU KNOW HOW MUCH THIS IS COSTING YOUR COMPANY EACH YEAR?

The benefits of implementing a document management strategy have been well detailed at this point. For years independent consultants like Pricewaterhouse Coopers and the Gartner Group have been providing metrics on the many advantages including reduced print, storage and clerical costs. These studies have also clearly illustrated our propensity for losing critical documents and the high costs associated with re-creating them. The benefits of automating repetitive business processes while enforcing business rules through workflow are also unquestionable. **Don't wait any more, it's costing you more money than you think!!!**
